

The Reinvention of Nearly Everything

The background features a vibrant, multi-colored spiral on the left side, transitioning from purple and blue at the bottom to green and yellow at the top. A bright, glowing light streak curves across the right side of the image, adding a sense of motion and energy.

We're in the middle
of a global
renaissance. There's
a global movement
underway to question
the very foundations
and designs that we
have built modern
society on. And the
revolution is being
streamed 24/7

**Humanity is waiting for
the Founding Fathers
and Founding Mothers to
bring forth the vision and
steps... to the next stage
of a hopeful integrated
model of Global
Civilization.**

**Inspired by Ken Wilber
A Theory of Everything**

The nature of human nature
is changing...

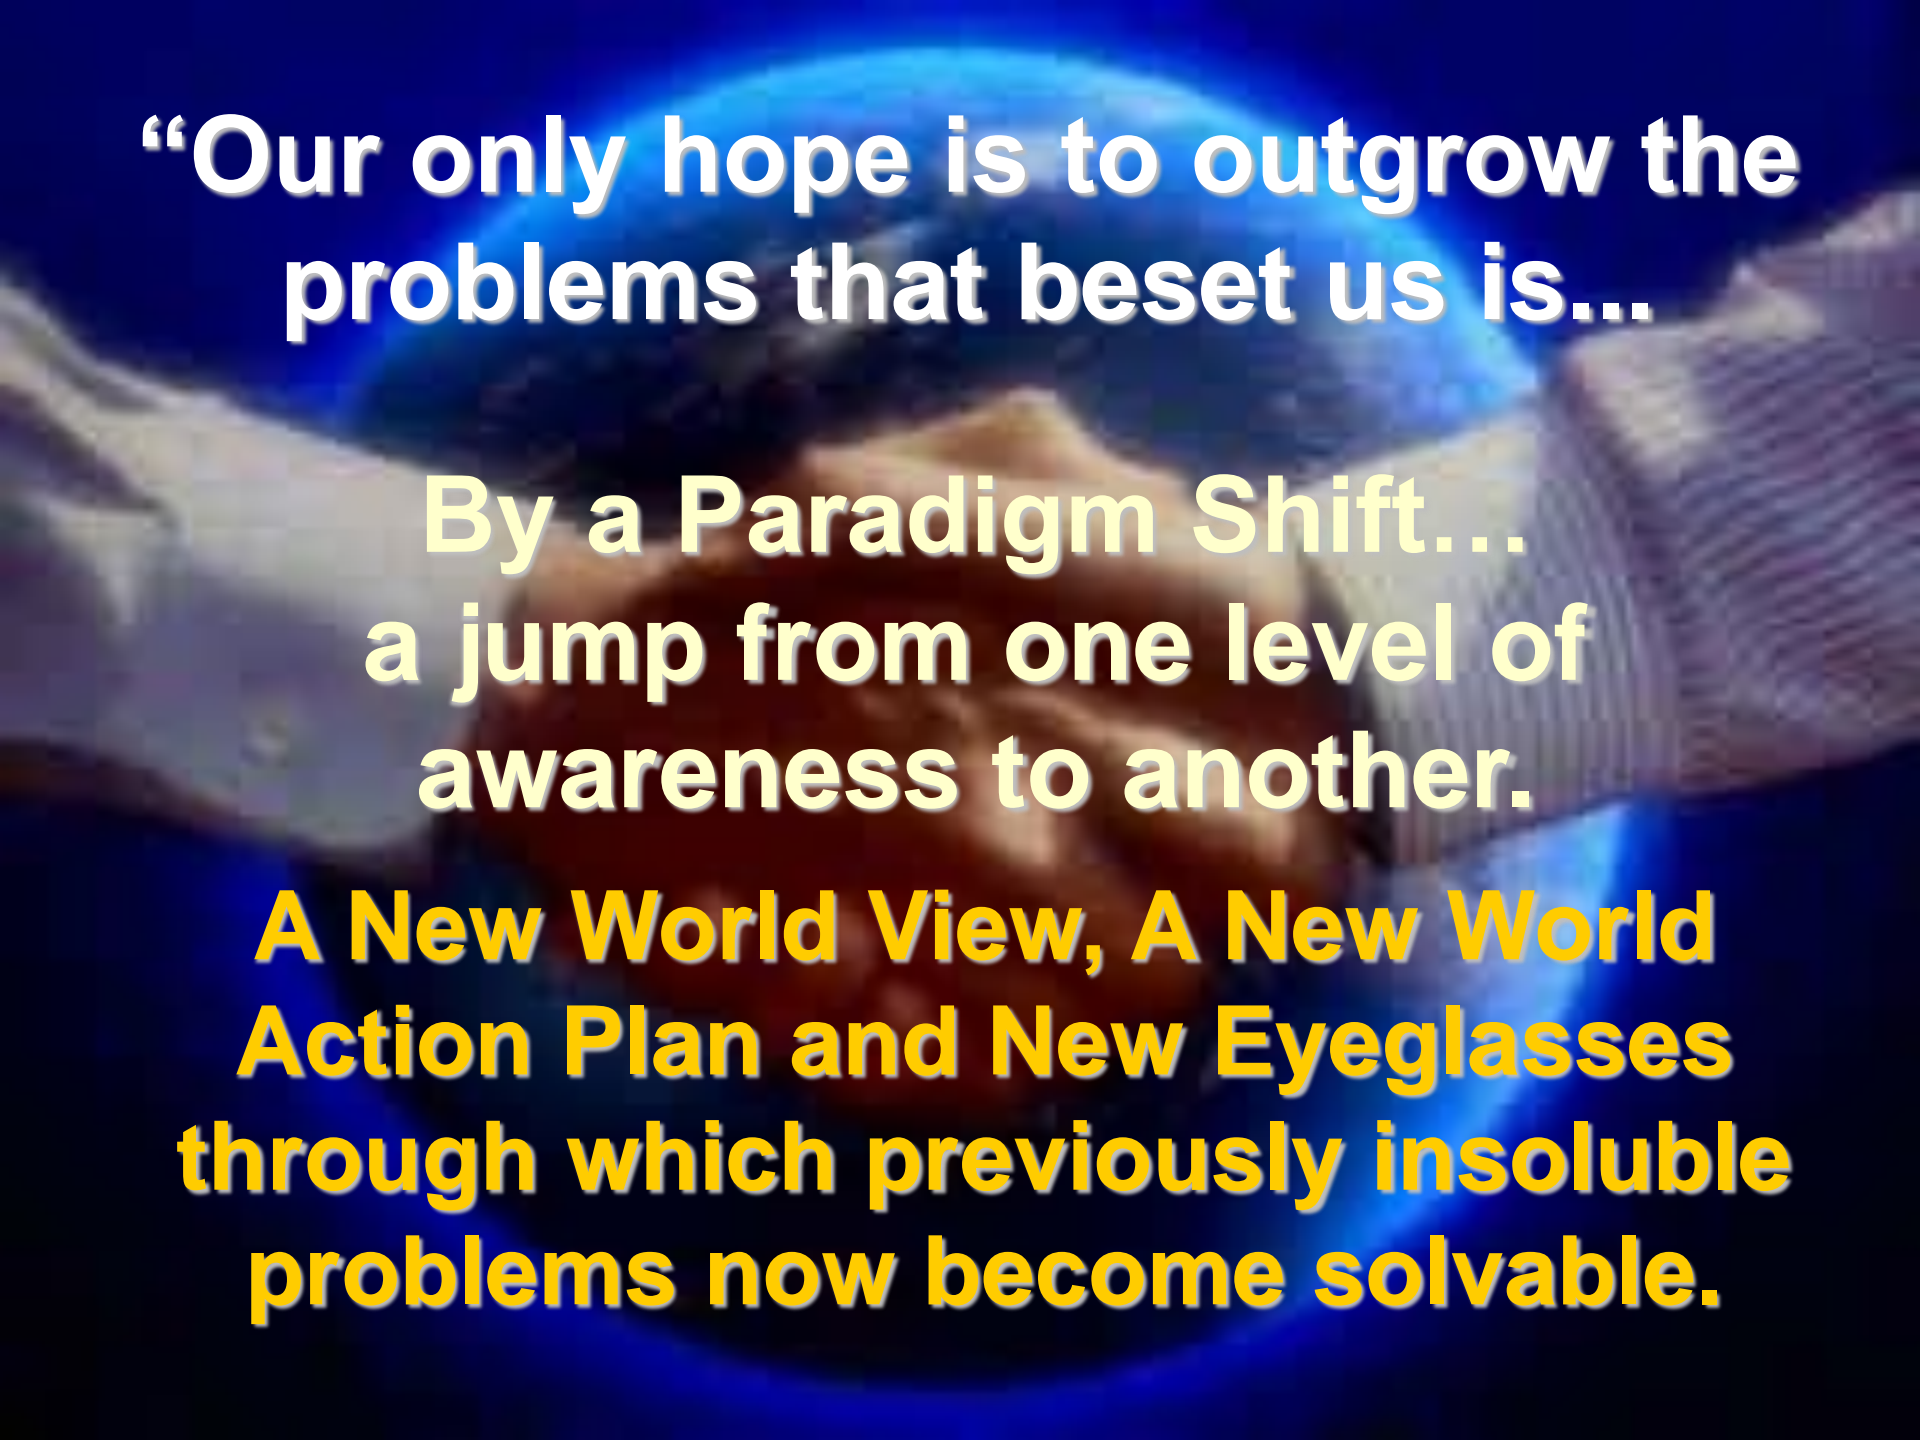

**Amidst all our global problems and
deteriorating systems of an old era...**

**A flight path
and a new
Trajectory is
now unfolding
to...**

**...a new level of thinking
and feeling and a new way
of adapting to change...**

People are looking for solutions to a... New Era

**“Our only hope is to outgrow the
problems that beset us is...**

**By a Paradigm Shift...
a jump from one level of
awareness to another.**

**A New World View, A New World
Action Plan and New Eyeglasses
through which previously insoluble
problems now become solvable.**

**“Problems cannot
be solved at the
same level of
awareness that
created them.”**

Albert Einstein

How does a current level of awareness get changed?

When our most primary understandings are replaced by new understandings more in sync with the evolving realities and challenges of the present.

The paradigm of thinking is at
the root of how everybody thinks

Levels of thinking

evolve in successive stages

A society's pith, its deeply shared
convictions and common sense about how
the world works, how opportunities and
problems are handled, how people
are to think and act.

“Our significant problems cannot be solved at the same *level of thinking* that created them in the first place.”

Not because thinking is sometimes faulty

But because it creates its own problems which cannot be solved within its own ego frame of reference

The whole underlying way of thinking of a whole society needs to shift in the next 10 years....

**We are currently in a invisible
Tug of War between an
Old Falling Era...and a **New Ascending Era.****

- **Nudging the tug-of-war to its tipping point
is the one frontier that matters.**

**Survival of the human and other
species is at stake.**

The outcome is precarious.

Time is running out!

New and Old Paradigms

New Paradigm Models

- Win+Win+Win World
- New Values
- Civil Society
- New Partnerships
- Sustainable Societies
- Ecology and New Economics
- Cooperative Communities
- Grassroots Democracies
- New Economic Indicators_

New Thinking Models

- Systems Thinking Approach
- Thinking in Wholes & Relationships
- Interdependence
- Understanding Complexity
- Seeing Interconnections
- Emerging Global Values Standards
- Synchronicity
- Emerging new institutional models
- Higher Vibrational Systems

Old Paradigm Models

- Global Economic Warfare
- Brutal Competition
- Pollution and Global Warming
- Hierarchy Politics / Economics
- Elite Science
- Rigidity, Inclusiveness
- Institutional and Economic Decay
- Industrial Paradigm
- Gross Domestic Profit Indicators

Old Thinking Models

- Thinking in Parts
- Objects / Subject-Object Thought
- Isolation and Separation
- Specificity
- Seeing only Simplicity

The New Paradigms are Bubbling in all of us..

Crossing into conscious awareness for many of us
Like a new operating system
we are all beginning to install.

“The world is at the crossroads.

**We are the first generation that can irreversibly transform
the planet for the worse; we are the last generation that
can avert disaster.”**

— Clem Sunter.. Futurist —

R. Buckminster Fuller - 1980

“Think of it. We are blessed with technology that would be indescribable to our forefathers. We have the wherewithal, the know-it-all, to feed everybody, clothe everybody, give every human on earth a chance. We know now what we could never have known before — that we now have an option for all humanity to “make it” successfully on this planet in this lifetime. Whether it is to be Utopia or Oblivion will be a touch-and-go relay race right up to the final moment.”

Nudging...a New Era.

Humanity has Entered a Funnel

Metaphorically, the current situation for people on the Earth can be viewed as a funnel with diminishing room to maneuver. This situation is caused by the fact that mechanisms that provide essential life-supporting resources for society's continued existence on the planet, such as clean air, clean water, energy, productive topsoil are in decline. At the same time, society's demand for these resources and services is increasing. Current global structural support systems are inadequately designed to handle many global issues

NATIONAL SURVEY REVEALS BIODIVERSITY CRISIS - SCIENTIFIC EXPERTS BELIEVE WE ARE IN MIDST OF FASTEST MASS EXTINCTION IN EARTH'S HISTORY

Crisis Poses Major Threat to Human Survival; Public Unaware of Danger

WHAT:

The American Museum of Natural History and Louis Harris and Associates, Inc., in conjunction with the opening of the Museum's new Hall of Biodiversity, developed a nationwide survey titled Biodiversity in the Next Millennium. The survey reveals a startling gap in understanding between the scientific community and the general public concerning a current crisis in sustaining "biodiversity" - the variety and interdependence of the Earth's plants and animals.

HIGHLIGHTS:

- Seven out of ten biologists believe that we are in the midst of a mass extinction of living things, and that this dramatic loss of species poses a major threat to human existence in the next century.

THE COLORS OF THE NEW ERA

There are many, many positive new solutions that are developing in our world that are re-framing the models of our older dialectic civilization including; **solar energy, wind power, the Internet, fuel cells and battery powered cars, distance education, micro investment in the third world, participatory social economics, the home business revolution, spiritual communities, new rural intentional communities and city cooperatives, sustainable community models, Eco-city models etc.** The growth in global Civil Society is having a profound assisting and democratic effect on governments and foreign policy and social initiatives around the world.

An Environment for
Nudging...a New Era.

Objectives:

The principle objective of the World Shift Earth Village (“WSEV”) is to build and design an economically valid Ecological Resort in British Columbia Canada that is designed within a model that produces vitality for the individual while demonstrating practices that ensure a high quality of life and locally sustainable development, conservation of the bio-diversity of natural resources, and self-sustainability through social, economic, geologic, and climatic changes.

World Shift Earth Village will provide a place where families, and adults can relax, play, swim, ride a horse, go canoeing, hiking, fish and golf. As well our environment will surround our patrons will an ambiance of education, workshops, displays, conferences and new media experiences on ecological and healthy living for personal development and positive personal and global transformation.

Earth Village Resort

with a New Outlook.
An Environment for
Nudging...a New Era.

Education and Transfer

A further objective is the substantive exchange, and transfer of empirically tested practices knowledge and or technologies which produce skills that ensure the development and sustainability of World Shift Earth Village's social, economic and environmental attributes in other locations around the world. The development of these sustainable educational tools and technologies is envisioned to provide for their expansion to a greater part of the Planet. Various village humanitarian and commercial organizations will accomplish this objective through interdependent development, education, local induction of self-sustainable and ecologically sensitive technologies, practices, and products for application in rural and urban settings that are urgently needed worldwide.

Canada's Eco Tourist Resort
with a New Outlook.
An Environment for
Nudging...a New Era.

1. **Ecological Heat Storage**

2. **Lighting - Photovoltaic panels**, an optional wind generator, and batteries power full-spectrum compact fluorescent lights. When daylight is not sufficient, these lights are switched with light and motion sensors, so the room lights up when entered and darkens when exited,. The wall and ceiling surfaces may also contain phosphors that absorb the sun's light during the day and glow through the night.

3. **Windows** - Sunlight enters the south windows, warming the surfaces directly and also indirectly as the warm air circulates to the shaded surfaces. The windows consist of no less than three layers c clear Tedlar film, a very strong material that does not degrade in sunlight. The windows are soft like pillows.

4. **Air Heat Exchange** -

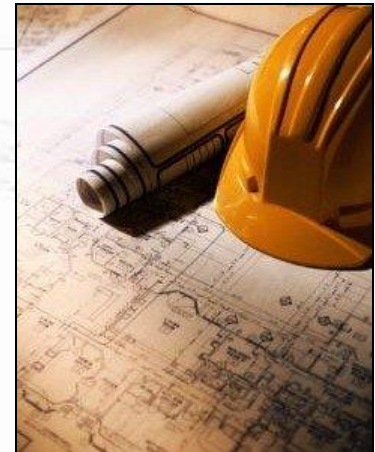

5. **Solar hot water and refrigeration** - Solar collectors on the south sloped roof panels both heat the water and cool the refrigerator.

6. **Electricity** - Solar Photovoltaic panels generate electricity. They can be mounted where most convenient or in treetops in a forested location. Wind power from an optional wind generator in the tree tops increases in winter and during storms, just as solar power is decreasing and as the lighting needs increase.

7. **Rainwater** - Rainwater on the roofs runs into gutters, then flows into a cold water tank located in the ceiling between the rooms, above the closets.

8. **Waste water** - Greywater from the sinks and shower flows through a sand filter, then to the hydroponics gardens.

Hydroponics Gardens - Hydroponics trays are fitted to the structure, which are automatically feed by the filtered Greywater system.

large water cycle of a landscape is intact, then the land, nature, the economy and the people are flourishing. Desertification, floods, the rising sea level, forest fires and droughts are not fate but the result of a disturbed hydrologic balance. Nowadays water is dammed, deviated, privatized and turned into a commodity. One billion people on the planet are without access to clean drinking water, while others are following their profit motive. It is in our hands to change this. The large water cycles can be restored, even in extremely damaged landscapes. All around the world

transformation and change.**

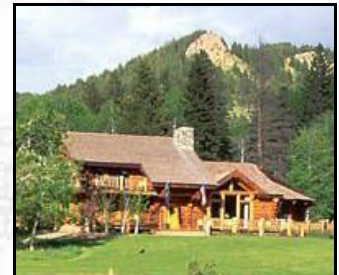

Earth Village Conclusion

Humanity is faced with the most challenging issues of all times. We believe many of humanity's challenges will require solutions based on break-through vision, new technologies, new financing networks and new educational and transformational models and a new collaboration and cooperation. Most experts believe that unresolved environmental and social issues without attention will only worsen over time. Now, more than ever before, new inspiration and vision and the early, rapid scaling of new technological and community solutions will be a critical component in solving many of these known local and community challenges. Of primary concern is that if some of these challenges become a crisis, their negative impacts could be impossible to reverse.

Our world is in the middle of a great process of transition from the terminal structures of the industrial age to new models of a sustainable ecological global society. In this time of great transition from old models of civilization to the new models that address the needs of our current time. From one set of outdated systems and beliefs to a new set of working structures that will carry humanity and civilization safely forward. Communities need to be inspired, educated and entertained on what is very practical and indeed what is possible to shift the daily habits and economic processes from the environmentally destructive to the creative and towards the ecological. **The World Shift Earth Village Network will engage significant Economic, Educational and Environmental benefits to many areas in global society.**

World Shift Earth Village inspiring a New Era of Hope

To hope means to be ready at every moment for that which is not yet born, and yet not become desperate if there is no birth in our lifetime.

* Erich Fromm/Author

The above statement amplifies the urgent needs of our time. If we move quickly in establishing a new cooperative civilization we will intercept the disasters awaiting on our horizon.

◆ Our Proposal

We are looking to build our board of directors, initial investors and advisors that will assist in the sponsorship of one years operating costs to produce a detailed feasibility documented plan and step by step economic models. The plan is a multi billion dollar global financing for a World Shift Village for every city in the world that can support the economics.
